Disclaimer

This Business Requirements Document outlines the functional and non-functional requirements agreed upon by the relevant stakeholders at the time of their preparation. The information contained here is provided for the purpose of guiding system design, development activities, project planning, and acceptance validation.

The wireframes included in this document are low fidelity and are intended only to illustrate the general concept and user flow. These wireframes are not final and are subject to change based on IBM BPM platform limitations and implementation requirements. Final screen designs may differ from the representations shown here.

While every effort has been made to ensure the accuracy and completeness of this document, the authors and stakeholders acknowledge that requirements are based on the best information available at the time of approval. Accordingly:

The BRD shall serve as the primary reference for all downstream project phases.

Any changes, additions, or clarifications to the requirements after approval may impact project scope, timelines, costs, and deliverables.

Modifications to the approved requirements must follow the project's formal change-control process and may require issuance of an updated version of this document.

By reviewing and approving this BRD, stakeholders confirm their understanding of the requirements described herein and accept that any post-approval changes are subject to structured governance and may result in adjusted project commitments.

1 Overview

1.1 Purpose of this document

This document serves as the primary business reference for the **Corporate Lending – Prepayment** process. It defines the business scope, rules, and process flows that govern prepayment within corporate lending facilities and acts as a foundation for all related design, development, and implementation activities.

The document is intended for review and validation by business stakeholders, process owners, and assigned technical Single Points of Contact (SPOCs) involved throughout the analysis and implementation

1.2 General Details

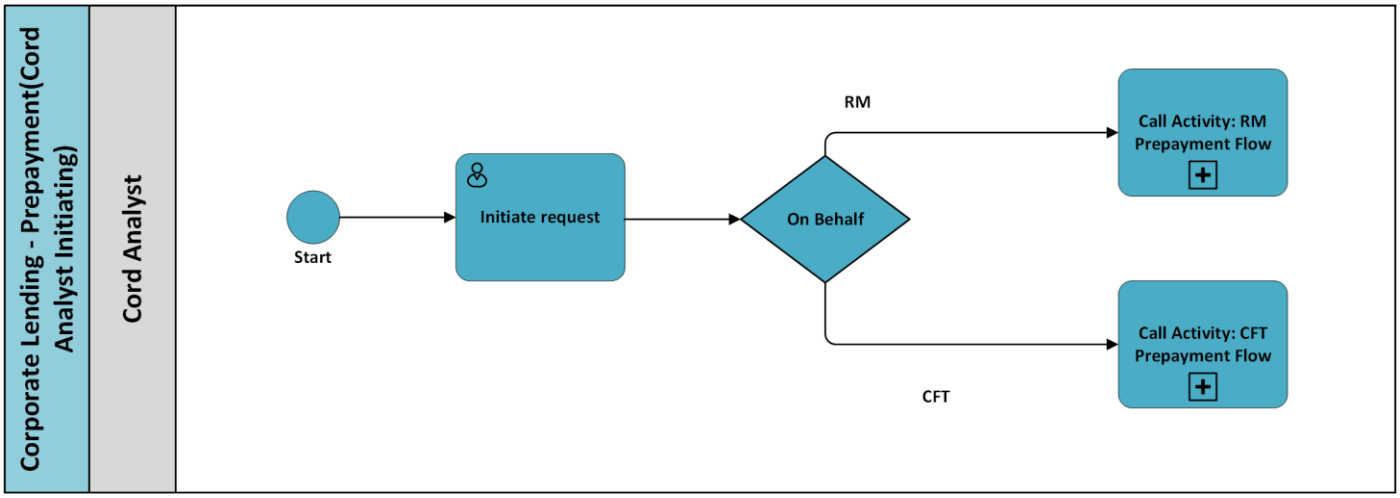
2 User Role & Description

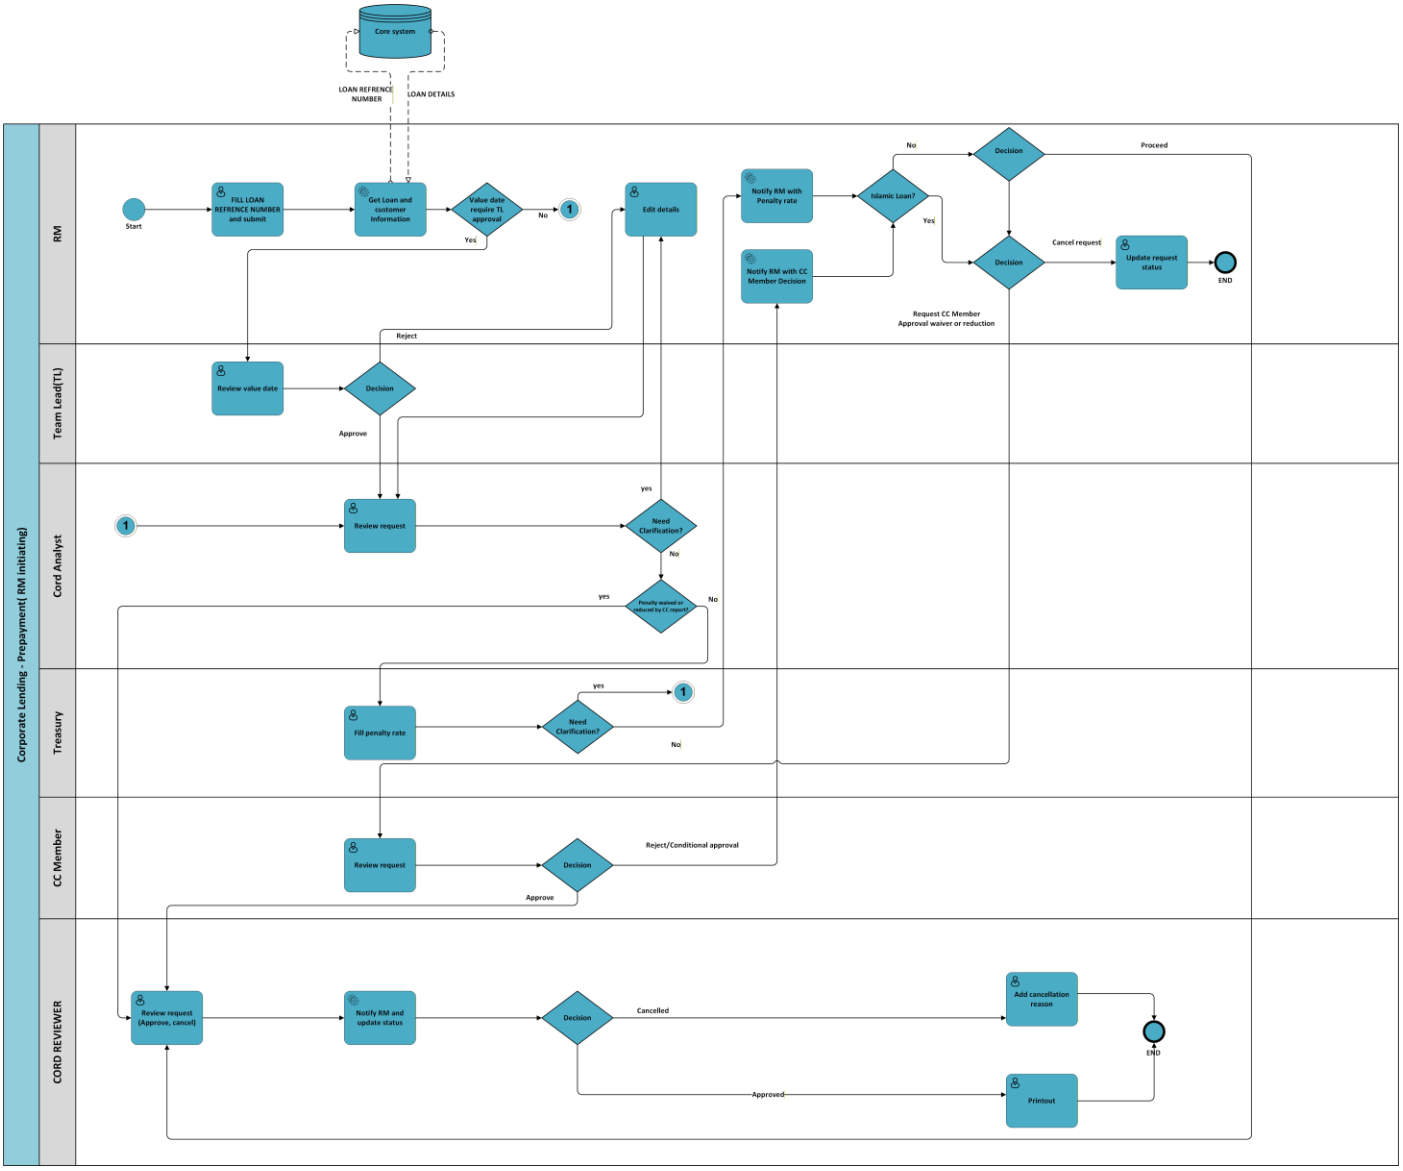
Role	Description
Relationship Manager (RM)	Owns the relationship with assigned customers; usually corporate or high-value retail clients, and they are considered the link between the customer and bank as each Account Number is linked to a specific Relationship Manager.
Contract Finance Team (CFT)	Responsible for handling the financial and contractual operations related to corporate lending facilities. Within the Corporate Lending context, the team initiates prepayment requests based on active loan contracts and agreed financing terms, acting as a key operational function between lending operations and downstream approval processes.
Cord Analyst	Responsible for initiating and processing Corporate Lending requests within the CORD system. The CORD Analyst reviews submitted requests for completeness and accuracy, validates required data and documents, performs preliminary checks in accordance with lending policies, and prepares the request for further review and approval.
Treasury	Responsible for managing the financial and liquidity aspects related to corporate lending transactions. The Treasury team validates funding availability, reviews prepayment financial impacts (such as settlement amounts, interest, and fees), and confirms that transactions align with the bank's liquidity and cash management policies.
Credit Committee Member	Represents the business-side evaluation within the Credit Committee. Reviews corporate lending requests from a commercial and financial perspective and validates the business justification in line with approved credit policies and delegated authority.
Cord Reviewer	Represents the business function responsible for reviewing corporate lending requests to ensure they align with approved credit policies, risk appetite, and internal governance. In the Corporate Lending process, the CORD Reviewer assesses the request from a business and credit perspective and decides whether to approve it or cancel it before further progression.
Team Leader (TL)	A supervisory role within the Relationship Management structure responsible for reviewing and approving requests escalated by Relationship Managers in accordance with internal approval matrix.

3 Workflow Diagram

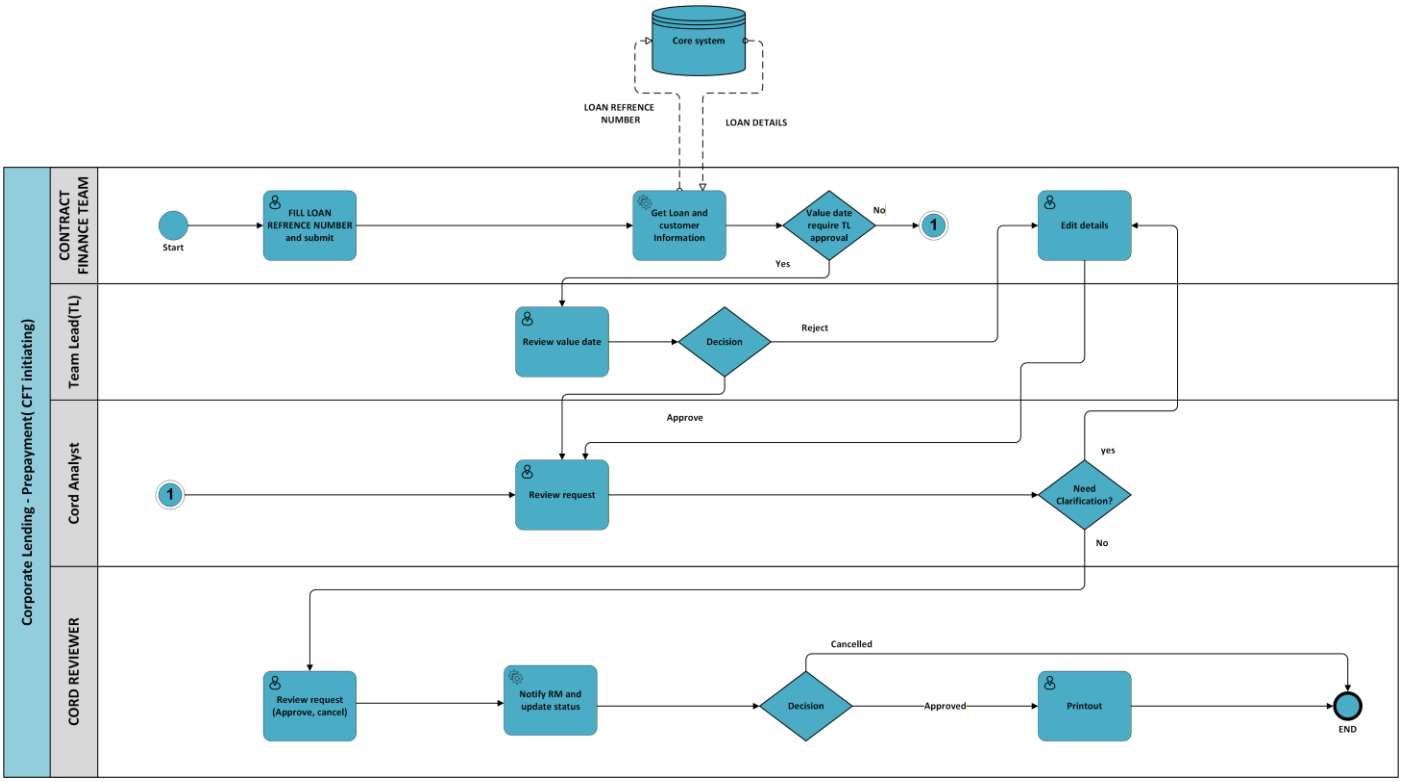
3.1 Prepayment Process Initiated by Cord Analyst



3.2 Prepayment Process Initiated by Relationship Manager (RM)



3.3 Prepayment Process Initiated by Contract Finance Team (CFT)



4 System General Rules

Code	Description
GR-01	System should display error messages retrieved from any integration point.
GR-02	System should display message **MSG02,** if user enters 0 or negative value in any Number field.
GR-03	System should display message **MSG03** for each required field, if user submits without entering any value.
GR-04	System should update History Table after each stage completion.
GR-05	System should show all screens in English.
GR-06	System should allow entering the date manually or by selecting the date from a date picker.
GR-07	All "Date" input fields contain a placeholder (DD/MM/YYYY) to allow the user to enter the date correctly.
GR-08	System should display message **MSG15**, if date format is not (DD/MM/YYYY).
GR-09	All numeric fields will only accept English numbers (0,1, 2,…).
GR-10	Alphanumeric fields will accept English or Arabic inputs.
GR-11	System should show popup with message **MSG14**, if user choose to cancel the process at initiation.
GR-12	All email recipients should be configurable.
GR-13	All SLA durations should be configurable.
GR-14	System should display popup to add comments, if user choose to return the request to one of the previous stages.

5 Task State Table

State	Next state	Reason
Available	Claimed	User claimed the task
Claimed	Completed	User completed the task

6 Request State Table

State	Next state	Reason	User
Draft	**Cord analyst review**	Submitting the request	RM, Contract finance team, Cord Analyst
Draft	**TL review**	Submitting the request while “Prepayment value date” equal to request date	RM, Contract finance team, Cord Analyst
TL review	**Cord analyst review**	Approve “Prepayment value date”	Team Lead (TL)
TL review	**Edit Request**	Reject “Prepayment value date”	Team Lead (TL)
Cord analyst review	**Edit Request**	Request edit or clarification from initiator	Cord Analyst
Cord analyst review	**Treasury Processing**	Send request to Treasury for Penalty rate	Cord Analyst
Cord analyst review	**Cord Reviewer**	Send request to reviewer (No Penalty)	Cord Analyst
Edit Request	**Cord analyst review**	Provide clarification and submit	RM, Contract finance team
Treasury Processing	**Cord analyst review**	Request clarification from cord analyst	Treasury
Treasury Processing	**RM decision**	Filling in the penalty rate	Treasury
RM decision	**Canceled**	Cancel the request	RM
RM decision	**CC Member review**	Request CC member approval for waiving penalty	RM
RM decision	**Cord Reviewer**	Proceed with the penalty rate	RM
CC Member review	**Cord Reviewer**	Approve to waive the penalty	CC Member
CC Member review	**RM decision**	Conditional approval	CC Members
CC Member review	**RM decision**	Reject to waive the penalty	CC Member
Cord Reviewer	**Approved**	Approve the request	Cord Reviewer
Cord Reviewer	**Canceled**	Cancel the request	Cord Reviewer

7 User Stories Titles

Code	Description
US-01	As a System, I want to receive prepayment initiation request from the Contract Finance System, so that the request is automatically created and processed as initiated by the Contract Finance Team.
US-02	As a Treasury user, I want to provide the applicable penalty rate, so that the system can derive the break funding cost
US-03	As a CORD Analyst, I want to provide clarification if requested by the treasury
US-04	As a Relationship Manager, I want to review the penalty rate, so that I can decide (Proceed, request CC member approval, cancel the request).

US-10	As a User, I want to update a prepayment request that was returned to me, so that I can modify the needed details
US-11	As a Team Leader (TL), I want to review a prepayment request, so that I can decide (Approve, reject) regarding prepayment value date

8 User stories details

8.1.1 As a System, I want to receive prepayment initiation request from the Contract Finance System, so that the request is automatically created and processed as initiated by the Contract Finance Team.

8.1.2 Workflow

Code	US-01	
Description	This story enables the Corporate Lending System to receive and create a new prepayment request via integration from the Contract Finance System.	
Precondition	Integration between Corporate Lending System and Contract Finance System is active. Incoming request must contain mandatory data fields. Loan must be eligible for prepayment.	
Users	• Contract Finance System (External System)	
Flow	User action	System behavior
	Send prepayment initiation request via API	Validate payload Validate loan eligibility Create new prepayment request Auto-populate initiation form fields Set Initiator Role = Contract Finance Team Set Request Initiator = System Integration User Generate Request Number Show status = Submitted Route task to Cord Analyst inbox Notify Cord Analyst with **EM01**

8.1.3 Request Fields

8.1.3.1 Fields to be retrieved from integration

#	English name	Type	Mandatory	Notes
1.	Loan reference number	Text	Required	-
2.	Source System	Text	Required	Contract Finance System
3.	Request date	Date	Required	System timestamp
4.	Prepayment value	Text	Required	
5.	Prepayment Value Date	Text	Required	-

8.1.4 Business Rules

Code	Business rule
BR-01	Requests received from Contract Finance System shall be treated as initiated by Contract Finance Team.
BR-02	All routing, validations, and permissions applicable to CFT-initiated requests shall apply.
BR-03	In case of validation failure, system shall reject the request and return error response to source system.

8.2 As a Treasury user, I want to provide the applicable penalty rate, so that the system can derive the break funding cost

8.2.1 Workflow

Code	US-02	
Description	This story allows the User to review prepayment request and fill in the penalty rate or request clarification from Cord analyst	
Precondition	User must be logged in to the system User already has available review task Request in state “Treasury Processing ”	
Users	• Treasury	
Flow	User action	System behavior
	Follow the same workflow as US-01	-
	Click on “Claim” icon	Show request details.
	Enter required fields Click on “Submit” button	Show popup for user to enter comments.
	Click on “Confirm” button	Notify RM with **EM01** Request status should be updated to RM decision Task will be available for RM decision Show success message **MSG11.** Route to inbox page.
Alternative Flow 1	Follow the same workflow as US-01	-
	Click on “Claim” icon	Show request details.
	Click on “Ask for Clarification” button	Show Clarification popup
	Add Comment Click on “Send” button	Clarification Task will be sent to the selected User Notify selected user with **EM04** Request status should be updated to Cord analyst review Show success message **MSG019** Route to inbox page

8.2.2 Request Fields

8.2.2.1 Initiation Form Fields

#	English name	Type	Mandatory	Notes
1.	Loan Reference Number	Text	Read Only	-
2.	Source System	Text	Read Only	Default Value: Corporate lending System
3.	Request Date	Text	Read Only	Format should be (DD/MM/YYYY – HH:MM)
4.	Request Number	Text	Read Only	System generated on submission
5.	Request Type	Text	Read Only	Default Value: Prepayment
6.	Initiator Role	Text	Read Only	Retrieved from database
7.	Request Initiator	Text	Read Only	Show User ID / Name
8.	On behalf of	Text	Read Only	Field only appears if the role “Cord Analyst” initiated the request

8.2.2.2 Customer Information

#	English name	Type	Mandatory	Notes
1.	ID No	Number	Read Only	Values are retrieved from Core system
2.	Customer A/C No	Number	Read Only	Values are retrieved from Core system
3.	Customer Name	Text	Read Only	Values are retrieved from Core system
4.	Region	Text	Read Only	Values are retrieved from Core system

8.2.2.3 Prepayment Loan Details

#	English name	Type	Mandatory	Notes
1.	Loan Type	Text	Read Only	Values are retrieved from Core system
2.	Loan Outstanding Amount	Number	Read Only	Values are retrieved from Core system
3.	Prepayment Amount	Number	Read Only	Value less than or equal to "Loan Outstanding Amount"
4.	Full / Partial Settlement	Text	Read Only	-
5.	Original Drawdown Date	Date	Read Only	Values are retrieved from Core system
6.	Previous Rollover Date	Date	Read Only	Values are retrieved from Core system
7.	Next Rollover Date	Date	Read Only	Values are retrieved from Core system
8.	Final Maturity Date	Date	Read Only	Values are retrieved from Core system
9.	Prepayment Value Date	Date	Read Only	-
10.	Existing Loan / Profit Rate	Number	Read Only	Values are retrieved from Core system

8.2.2.4 Penalty/ Charges Details

#	English name	Type	Mandatory	Notes
1.	Commission to be charged up to	Text	Read Only	-
2.	Penalty waived/reduced as per CCR	Text	Read Only	-
3.	Penalty Rate	Number	Read Only	If "treasury penalty rate" is more than 1.5 the value will reflect here If "treasury penalty rate" is less than 1.5 then the value here is "1.5" If "treasury penalty rate" is =1.5 Field value 1.5
4.	Waived / Reduced (Yes/No)	Text	Read Only	-

5.	Waived / Reduced (%)	Number	Read Only	(Standard Penalty Rate – Penalty Rate) ÷ Standard Penalty Rate × 100
6.	Treasury input			Label
7.	Treasury Penalty rate	Number	Required	Default is 1.5 editable
8.	Waiver / Reduction justification	Text	Required	This field appears only if "treasury penalty rate" is less than 1.5

8.2.2.5 Add Attachment Fields

#	English name	Type	Mandatory	Notes
1.	Document Name EN	Text	Required	-
2.	Document Name AR	Text	Required	-
3.	Select File	Button	Required	System should allow the user to remove the attachment before uploading
4.	Upload	Button	Optional	Button will be disabled until all required fields are entered **MSG05** **MSG06** **MSG07**

8.2.2.6 Attachments Table

#	English name	Type	Mandatory	Notes
1.	Document Name EN	Text	Read Only	Regional Head approval to be shown here
2.	Document Name AR	Text	Read Only	-
3.	Download	Icon	Optional	-
4.	Preview	Icon	Optional	-

8.2.2.7 History Table

#	English name	Type	Mandatory	Notes
1.	Username and ID	Text	Read Only	-
2.	Task Name	Text	Read Only	-
3.	Task Number	Text	Read Only	-
4.	Task Completion Date	Text	Read Only	-
5.	Comments	Text	Read Only	-

8.2.2.8 Ask for clarifications popup Fields

#	English name	Type	Mandatory	Notes
1.	Select user to ask	Dropdown	Required	Default the cord analyst who reviewed the request
2.	Clarification message	Text	Required	Max 500 characters

3.	Cancel	Button	Optional	Route to form
4.	Send clarification request	Button	Optional	Send request

8.2.2.9 Buttons Group

#	English name	Type	Mandatory	Notes
1.	Submit	Button	Optional	**MSG20** Under the field “Penalty rate”
2.	Ask for Clarification	Button	Optional	-
3.	Close	Button	Optional	System should close the request and route to inbox page.

8.2.3 Business Rules

Code	Business rule
BR-01	System will not allow user to enter penalty rate less than 1.5
BR-02	System will set the Cord analyst who reviewed the request as default user when the action “Ask for clarification” is selected with allowing selecting other Cord analyst
BR-03	System will send request to the corresponding RM based on the identified RM in the core system for the customer

8.2.1 Screens
